

## NTE960 Integrated Circuit 3-Terminal Positive Voltage Regulator, 5V

The NTE960 fixed-voltage regulator is a monolithic integrated circuit in a TO220 type package designed for use in a wide variety of applications including local, on-card regulation. This regulator employs internal current limiting, thermal shutdown, and safe-area compensation. With adequate heat-sinking it can deliver output currents in excess of 1.0 ampere.

## Features:

- Output Current in Excess of 1.0 Ampere
- No External Components Reguired
- Internal Thermal Overload Protection
- Internal Short–Circuit Current Limiting
- Output Transistor Safe–Area Compensation
